

Double Row Angular Contact Ball Bearing

306230

Double Row Angular Contact Ball Bearing
Disc Harrow

Technical Specification

C_{dyn}	Dynamic load rating	37.5 kN
C_o	Static load rating	26.5 kN
D	Outside diameter	62 mm
d	Bore diameter	30 mm
kg	Mass	0.39 kg
B	Width inner ring	30 mm
α	Contact angle	34 °

Sealing

RS SEAL / RS SEAL (2RS)

The older type of the single seal. Prevents penetration of soil, dust and water and since exposed to the impact of abrasive particles is expendable more than some new types of seals. Due to extended friction, the permitted speeds are lower. It was gradually replaced with the improved versions of S. Because of the traditional reasons Y bearings with this kind of seal do not have the additional sealing mark. It is used with the Y-bearings and deep groove ball bearings.
